# DeFi Market & Protocols Overview

## Total Value Locked (TVL)

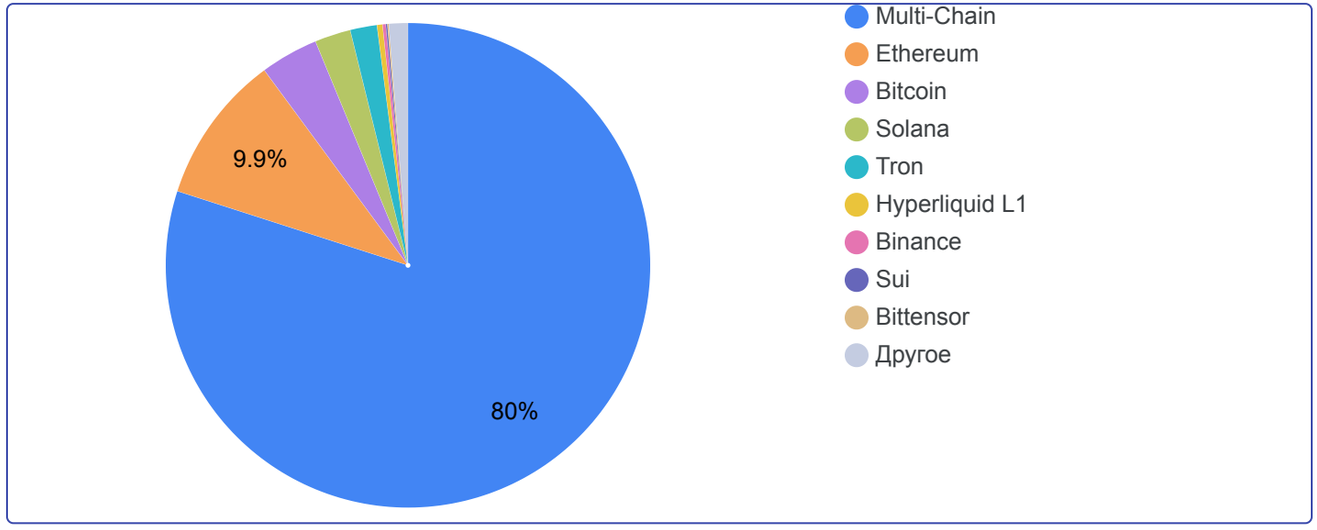

570,73 млрд

## Top Protocols Table

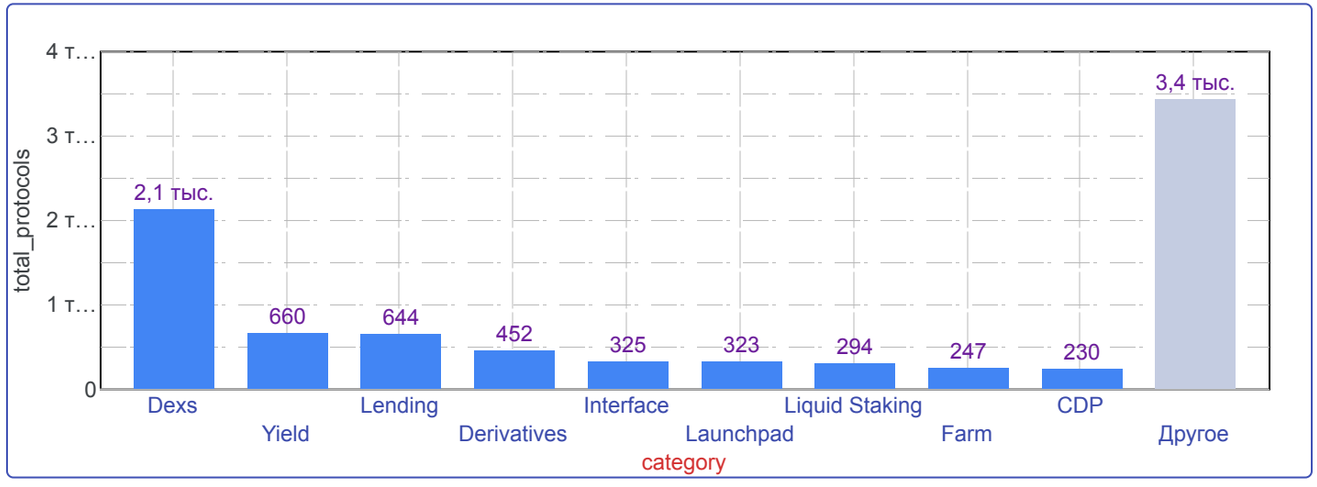

| | category | total_prot… | total_tvl |
|---|---|---|---|
| 1. | CEX | 80,00 | 302 878 900 830,67 |
| 2. | Bridge | 173,00 | 57 242 048 741,63 |
| 3. | Liquid Staking | 294,00 | 53 733 400 866,57 |
| 4. | Lending | 644,00 | 51 112 780 597,46 |
| 5. | Staking Pool | 77,00 | 14 107 600 228,33 |
| 6. | Dexs | 2 125,00 | 12 077 622 950,74 |
| 7. | Canonical Bri… | 98,00 | 10 499 184 152,37 |
| 8. | Restaking | 14,00 | 9 682 412 441,52 |
| 9. | Risk Curators | 96,00 | 9 442 610 062,46 |
| 1… | Onchain Capi… | 85,00 | 9 326 877 895,19 |
| 1… | CDP | 230,00 | 7 743 585 895,58 |
| 1… | Basis Trading | 43,00 | 7 726 283 138,91 |
| 1… | Yield | 660,00 | 4 870 298 823,24 |
| 1… | RWA | 176,00 | 4 098 790 735,19 |

1 - 50 / 103

## TVL Distribution by Blockchain (Top Chains)

## TVL by Protocol Category

**Key Analytics & Business Insights:**

1. High Capital Centralization: Over 80% of the total market TVL (~$570B) is aggregated across Multi-Chain protocols and Ethereum, confirming that liquidity remains heavily concentrated in established networks.
2. Dominant DeFi Sectors: According to category metrics, DEXs (2.1k+ protocols/pools), Yield, Lending, and Bridge/CEX Infrastructure represent the core foundation of lockable market capital.
3. Data Pipeline Optimization: Raw JSON API payloads were transformed through a 3-layer Medallion Architecture (Bronze $\rightarrow$ Silver $\rightarrow$ Gold) using dbt and Google BigQuery, eliminating duplicates via window functions (ROW_NUMBER()) before materializing into this BI data mart.
